Art Unit: 1654

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- (a) The method using the compounds of claim 2;
- (b) The method using the compounds of claim 3;
- (c) The method using the compounds of claim 4;
- (d) The method using the compounds of claim 5;
- (e) The method and compositions using the -B(D₁)(D₂) compounds of claims 7 and 17;
- (f) The method and compositions using the -C(O)-CF₂-G compounds of claims 7 and 17;
- (g) The method and compositions using the -P(O)(OJ)-J compounds of claims 7 and 17;
- (h) The method and compositions using the -C(O)-C(O)-NH₂ compounds of claims 7 and 17;
- (i) The method and compositions using the -C(O)-C(O)-OR or -C(O)-C(O)-OH compounds of claims 7 and 17; and
- (j) The method and compositions using the cyano compounds of claim 8 and 18.

These species are patentably distinct from each other because of the materially different structures of the active agents.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 7, 8, and 12-18 are generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1654

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (703) 308-3975. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.
